Objective

To work as a Junior RPA Developer or Automation Analyst, applying and expanding my knowledge of UiPath, Python and systems development, and delivering solutions that reduce manual work and increase operational efficiency.

Experience

IT Intern – Aumovio (spin-off of Continental Automotive) (March 2025 – Present)

- Develop, run and monitor attended and unattended RPA automations in UiPath Studio and UiPath Orchestrator, built on REFramework with exception handling, logging and monitoring, covering the full lifecycle: analysis, development, testing, user acceptance testing (UAT), deployment and support.
- Gather and analyze processes (process analysis) with business areas and produce the technical documentation (PDD and SDD).
- Built an automation monitoring dashboard in Python (Flask) and SQL Server, integrated with UiPath Orchestrator via REST API, to track robot status, executions, failures and schedules.
- Built a Django web application (SQL Server) for material monitoring and planning, with coverage-risk KPIs, filters, role-based access control and follow-up notifications, integrated with SAP data.
- Provide support for corporate systems (SAP, PowerShare and BMC) and work on user migration and access management projects in a multinational environment.

Education

- Bachelor's Degree in Computer Science – UniAnchieta (Expected graduation: 2027)
- Technical Degree in Business Administration – ETECVAV (2023)

Skills

- RPA Development: UiPath (Studio, Orchestrator, REFramework) and KNIME.
- Python Development (Flask, Django, Pandas, Selenium), REST APIs, JSON/XML, SQL Server and Git.
- Web Development (HTML, CSS, JavaScript, TypeScript) and Power BI.
- Collaborative work with version control tools and Agile methodologies.
- Proactivity, resilience and continuous learning (currently studying Databricks).

Courses

- In progress – Complete Web Development (Udemy)
- 2026 – RPA: Automation with Python (Udemy)
- 2025 – Windows Server Hyper-V and Virtualization (Microsoft)
- 2025 – Introduction to Packet Tracer Exam (Cisco)
- 2025 – Networking Basics (Cisco)
- 2025 – Microsoft SQL Server (Udemy)
- 2025 – RPA Developer Foundation (UiPath)
- 2024 – Python Fundamentals 1 (Senai)
- 2023 – Power Business Intelligence (InterNews)
- 2022 – Complete Excel (Senai)
- 2022 – Public Speaking (Senac)
- 2021 – Digital Marketing and Social Media Sales (Senac)
- 2020 – Hardware, Networking, Laptops and Mobile Devices (Microlins)

Languages

- Portuguese (native) | English (professional, private lessons) | Italian (private lessons)

Projects

- Hackathon – AcadIA: AI-powered personalized education platform.
- Hackathon – Real Estate Values: model for identifying property values, held at UniAnchieta for the City of Jundiaí.
- Credit Score Prediction (AI): Random Forest and KNN to predict customers' credit ratings.
- Churn Analysis: identification of customer cancellation causes using Python and data analysis.
- Cryptocurrency Web Scraping: automated data collection with Selenium.
- Product Registration Bot (PyAutoGUI) and Email and PDF Automation with Python.
